

MiCAR Crypto Asset Classification

Problem

A new token is listed and cannot be clearly classified as e-money token, asset-referenced token, or other crypto asset.

Regulatory Requirements

MiCAR, AML requirements.

Options Considered

A: Classify manually. B: Publish unknown classification. C: Hold pending legal review.

Decision

Hold classification pending legal review.

Reasoning

Incorrect classification could mislead clients and breach crypto rules.

Risks

Delayed coverage, competitive disadvantage, legal workload.
