

Global KYI Master Data Standardization

Problem

Different jurisdictions use inconsistent master data attributes for Know Your Instrument controls.

Regulatory Requirements

Investor protection, AML/KYC, BCBS 239.

Options Considered

A: Maintain local attributes. B: Build global KYI master model. C: Outsource mapping to clients.

Decision

Build global KYI master model.

Reasoning

Standardized instrument data supports scalable compliance across jurisdictions.

Risks

Implementation cost, local exception handling, governance complexity.
