

Digital Asset Market Abuse Monitoring

Problem

A crypto-linked product shows suspicious pump-and-dump trading patterns across venues.

Regulatory Requirements

MiCAR, Market Abuse Regulation principles.

Options Considered

A: Close alert as volatile market. B: Escalate to surveillance team. C: Suspend all data updates.

Decision

Escalate to surveillance team.

Reasoning

Suspicious activity requires investigation and documented handling.

Risks

False positives, client impact, operational escalation burden.
