

BCBS 239 Data Lineage Request

Problem

A bank requests traceability for regulatory risk fields used in capital reporting.

Regulatory Requirements

BCBS 239, operational risk framework.

Options Considered

A: Provide final values only. B: Provide source lineage and transformations. C: Decline lineage request.

Decision

Provide source lineage and transformations.

Reasoning

Risk data aggregation requires traceable and explainable data flows.

Risks

Disclosure constraints, documentation gaps, higher support effort.
