

# Doc Hub Missing Manufacturer Documents

## Problem

Manufacturer documents for structured products are delayed during high issuance volume.

## Regulatory Requirements

PRIIPs, MiFID II investor protection.

## Options Considered

A: Publish product data only. B: Delay product activation. C: Publish with document pending status.

## Decision

Publish with document pending status and restrict retail use.

## Reasoning

Product data can be prepared while investor document requirements are protected.

## Risks

Operational backlog, retail restriction complaints, document mismatch risk.
